CHEMICAL RESISTANCE

Refer to CrownTech Chemical Resistance Guideline Technical Bulletin No. 9

SYSTEM DESCRIPTION

TerraCrown® Terrazzo is a pigmented two-component epoxy binder that is used to create the most decorative polymer floors in the construction industry. It is installed at a normal thickness of 250 mils (1/4"). The thickness of the installation affects the aggregate sizes. The most common chips are marble, which naturally occurs in different colors and different MOHs hardness. Recycled glass adds both color, mirrored glass creates a three-dimensional depth, while Mother of Pearl, other aggregates and pigment colors are incorporated to create unique "one of a kind" looks. It is VOC Compliant in all states and provinces in North America. Meets: 1. NTMA (National Terrazzo and Mosaic Association) 2. TTMAC (Terrazzo, Tile and Marble Association of Canada).

TYPICAL USES

• Airport, Bus, Train Terminals

• Hotel Lobbies &

 Retail Spaces & Mall Common Areas

Hospital and

Floors

Health Care Facility

- School & Universities
 - Pharmaceutical
- Floors
- High End Designer

BENEFITS

- Complies with USDA, FDA, FSMA. See Crown Polymers Technical Bulletin: 3 Food and Beverage
- See Crown Polymers
 Technical Bulletin: 4
 Coefficient of Friction.

Slip Resistance (ADA)

- LEED requirements. See Crown Polymers Technical Bulletin: 5 LEED information
- Cures to an inert finish. See Crown Polymers Technical Bulletin: 2 VOC Compliance

COLORS

Compliance.

Federal Standard 595C

& Custom Colors
